PROFESSIONAL SUMMARY

Results-oriented **Full Stack Developer** with hands-on experience in designing, developing, and deploying scalable web applications. Proficient in **JavaScript, Python, React, Node.js, and REST APIs**, with strong understanding of **frontend-backend integration, databases, and deployment workflows**. Adept at writing clean, maintainable code and collaborating in agile development environments.

TECHNICAL SKILLS

- **Frontend:** HTML5, CSS3, Tailwind, JavaScript (ES6+), React.js, Bootstrap
 - **Animation Library:** GSAP, Locomotive.js, Framer motion, Lenis
 - **Backend:** Node.js, Express.js, Python, Fastapi
 - **Databases:** MySQL, PostgreSQL, MongoDB
 - **APIs & Architecture:** RESTful APIs, MVC Architecture
 - **Tools & Platforms:** Git, GitHub, VS Code, Postman, swagger ui
 - **Other:** Authentication (JWT), CRUD Operations
-

PROJECTS

K72

K72 is a visually immersive, animation-rich creative agency website built with React, GSAP, and ScrollTrigger.

It blends high-end design with modern web motion principles to deliver a smooth, cinematic experience inspired by professional digital studios.

Technologies: React.js, Tailwind css, Gsap

- GSAP Animations - beautiful, high -performance motion effects.
- ScrollTrigger- scroll based transitions and interactions
- Modular react architecture - reusable ,maintainable components
- Optimized performance- Smooth animations with minimal reflows

- Deployed the application using **Docker / Cloud hosting**

QUERYFLOW

The Audience Query Management & Response System centralizes customer queries from email, social media, chat, mobile apps, and community platforms into a single unified dashboard. It uses AI-driven auto-tagging, sentiment analysis, and priority detection to route messages to the right teams and ensure fast, accurate responses.

Technologies: React js, Fast API, Supabase(Postgresql)

- Collect all incoming queries in one place.
- Auto tagging & classifications
- Smart routing system and realtime notifications
- Ensured security best practices for user data handling
- Analytics dashboard.

DROPBOX

A sleek and representative Dropbox-inspired landing page built with React, Tailwind CSS, and GSAP, Framer motion animations.

This project recreates the modern Dropbox feel with smooth transitions, animated text, and integrated autoplay videos — perfect for practicing front-end development and animation skills.

Technologies: React, Tailwind css, Framer motion

- React + vite for a fast development experience .
- Tailwind CSS for clean ,responsive styling.
- Motion animations for smooth ,modern UI transitions
- Autoplay video integration for a dynamic look
